APEXCARE INDIA EMPLOYEE HEALTH BENEFIT PROGRAMME (AIEHBP)
EXCLUSIONS, WAITING PERIODS AND COVERAGE EXCEPTIONS

Demonstration Version 1.0 | Effective date: 01 April 2026
Document code: AIEHBP-EXC-005
Primary audience: Claims, medical reviewers, members and grievance teams

FICTIONAL TRAINING DOCUMENT - NOT AN INSURANCE CONTRACT. This document is a synthetic example created for software development, retrieval testing, and claims-workflow demonstrations. A real insurer, employer, TPA, legal team, medical team, and compliance function must review and approve all wording, benefits, timelines, forms, and regulatory references before operational use.

Document-control rule: cite the document code, section, clause, page, and version in every decision.
Interpretation rule: the signed policy schedule and endorsements override this demonstration text.

1. HOW TO APPLY AN EXCLUSION

Exclusions must be matched to facts and read with exceptions and endorsements.

EXC-1.1 Burden of explanation

A rejection identifies the exact exclusion, relevant facts, evidence and causal connection. Keyword similarity alone is insufficient.

EXC-1.2 Specific over general

Use the most specific applicable clause. Do not combine unrelated exclusions to construct a broader denial.

EXC-1.3 Exceptions and overrides

Read every exception, benefit grant and endorsement before applying an exclusion. A covered carve-back controls within its stated scope.

EXC-1.4 Diagnostic uncertainty

Suspected, ruled-out and family-history conditions are not equivalent to a confirmed diagnosis.

2. GENERAL EXCLUSIONS

These exclusions apply after eligibility and benefit identification.

EXC-2.1 Investigation without active treatment
Admission primarily for evaluation, observation or diagnostics is excluded unless medically necessary active treatment or covered day-care is documented.

EXC-2.2 Rest cure and custodial care
Convalescent, respite, custodial, spa, wellness and non-clinical residential care are excluded.

EXC-2.3 Cosmetic or aesthetic treatment
Treatment primarily to alter appearance is excluded. Reconstructive treatment after covered accident, burn, cancer surgery or medically necessary correction is assessed under core cover.

EXC-2.4 Obesity and weight control
Weight reduction programmes, supplements and bariatric treatment are excluded unless an endorsement lists medically necessary bariatric surgery and its criteria are met.

EXC-2.5 Gender affirmation
Gender affirmation treatment is excluded under this fictional schedule unless a signed endorsement includes it. Production wording requires legal and compliance review.

EXC-2.6 Hazardous or professional sport
Injury from professional sport or specifically excluded high-risk competitive activity is excluded. Ordinary recreational exercise is not automatically hazardous.

EXC-2.7 Breach of law
Treatment arising directly from intentional participation in a criminal act may be excluded subject to evidence and applicable protections. A traffic allegation alone does not establish intentional criminal conduct.

EXC-2.8 Substance misuse
Treatment directly attributable to intentional misuse of intoxicants may be excluded, but emergency stabilization and legally protected treatment require separate review. A prescribed medicine is not misuse merely because it is controlled.

EXC-2.9 Unproven or experimental treatment
Treatment lacking accepted evidence or required approval is excluded. The medical reviewer must identify the evidence basis and distinguish approved modern treatment.

EXC-2.10 Infertility and assisted reproduction
Infertility evaluation, assisted conception, surrogacy-related expenses and sterilisation reversal are excluded unless endorsed.

EXC-2.11 Routine dental treatment
Dental consultation, fillings, cleaning, dentures, orthodontics and non-accidental oral surgery are excluded. Emergency treatment of natural teeth damaged directly by a covered accident is included up to BEN-2.18.

EXC-2.12 Vision and hearing aids
Spectacles, contact lenses, hearing aids and routine refractive correction are excluded unless required as part of a covered procedure or endorsed.

EXC-2.13 Preventive and screening services
Routine screening, vaccination and executive health checks are excluded unless the

schedule expressly grants a preventive benefit. Diagnostic testing for symptoms or covered treatment is not routine screening.

EXC-2.14 Non-medical convenience items
Personal comfort, guest, communication and administrative items listed in BEN-6 are not payable.

EXC-2.15 War and nuclear events
Treatment directly caused by war, invasion, armed conflict or nuclear contamination is excluded, subject to applicable mandatory protections.

EXC-2.16 Self-inflicted injury
Intentional self-injury is subject to medical, mental-health, legal and policy review and must not be automatically denied by a text match. Emergency and protected care require appropriate handling.

EXC-2.17 Maternity outside benefit
Pregnancy, childbirth and related expenses exceeding or falling outside the maternity benefit are excluded, except unrelated illness and covered newborn complications assessed separately.

EXC-2.18 Non-prescribed supplements
Health supplements, vitamins and tonics without a treatment-linked prescription are excluded. Prescribed nutritional support integral to covered hospitalization is reviewed clinically.

EXC-2.19 Overseas treatment
Treatment outside India is excluded unless an international emergency endorsement is active.

EXC-2.20 Excluded provider
Treatment at a provider formally excluded for the date of service may be inadmissible, except emergency stabilization where law or endorsement requires review.

3. WAITING-PERIOD EXCLUSIONS

Waiting periods postpone otherwise covered treatment; they are not permanent exclusions.

EXC-3.1 Initial thirty days
Illness beginning or treated within the first thirty days is excluded unless due to covered accident or an endorsement waives the period.

EXC-3.2 Specified twenty-four months
Conditions named in BEN-4.2 are excluded until twenty-four months of continuous cover are completed, subject to continuity credit and accident exception.

EXC-3.3 Pre-existing disease thirty-six months
Treatment attributable to a validated pre-existing disease is excluded until thirty-six months of continuous cover, unless waived or reduced.

EXC-3.4 Maternity nine months
Maternity claims are excluded until nine months of continuous cover unless the employer endorsement waives the period.

EXC-3.5 Date calculation
Calculate completed waiting period on the admission or service date. Preserve prior-coverage credits and documented breaks according to the endorsement.

4. CONDITION-SPECIFIC INTERPRETATION

Disease names alone do not decide coverage.

EXC-4.1 HIV and infectious disease

HIV or another infectious diagnosis is not listed as a blanket permanent exclusion in this demonstration plan. Apply active benefits, medical necessity, waiting periods and lawful terms.

EXC-4.2 Parkinson disease and dementia

Parkinson disease, dementia and Alzheimer disease are not blanket exclusions. Covered hospitalization is assessed under normal rules; custodial or long-term residential care may fall under EXC-2.2.

EXC-4.3 Congenital conditions

A congenital diagnosis is not automatically excluded. Review the benefit schedule, newborn cover, medical necessity and applicable requirements.

EXC-4.4 Mental health and attempted self-harm

Mental healthcare is a covered category under POL-5.4. Self-harm-related care requires sensitive clinical and legal review, not automatic keyword rejection.

EXC-4.5 Pregnancy complications

Pregnancy-related treatment is subject to maternity rules, but a condition unrelated to pregnancy must be assessed independently.

5. CARVE-BACKS AND EXCEPTIONS

These examples prevent overbroad exclusion application.

EXC-5.1 Reconstruction
   Reconstructive surgery following a covered accident or cancer treatment may be covered despite the cosmetic exclusion.

EXC-5.2 Accidental dental
   Treatment of natural teeth damaged directly in a covered accident may be covered despite routine dental exclusion.

EXC-5.3 Diagnostic admission
   Diagnostics integral to active treatment or a recognized day-care procedure may be covered despite investigation-only exclusion.

EXC-5.4 Prescribed nutrition
   Clinically necessary nutrition during covered critical care may be payable despite the supplement exclusion.

EXC-5.5 Emergency provider
   Emergency stabilization may require separate consideration even when provider status is disputed.

6. EXCLUSION DECISION CHECKLIST

Complete all checks before an adverse exclusion decision.

EXC-6.1 Policy scope
Confirm member, plan, policy version, service date, geography and endorsement.

EXC-6.2 Fact confirmation
Confirm diagnosis status, treatment, causation and clinical context from reliable evidence.

EXC-6.3 Clause match
Record one or more exact clauses and explain each required element.

EXC-6.4 Exception review
Check benefits, carve-backs, waiting-period completion, continuity and endorsements.

EXC-6.5 Authorization
Obtain medical, compliance or senior review where required by AIEHBP-SOP-006.

EXC-6.6 Communication
Provide a plain-language reason, evidence, clause citation and grievance route.
